

LabPhone

Efficiently communicate laboratory results to patients.

“Hello, this is Main Street Medical calling to let you know your lab results have been reviewed...”

Key features of LabPhone:

Reduce calls related to lab results: Reduce the number of incoming calls from patients asking for their results, and reduce the need for staff to make calls.

Ensure your lab messages are tracked: An easy to view dashboard screen contains alerts and status of lab messages for your patients.

Secure patient retrieval: Providers and patients communicate in a secure mailbox.

Easy message management: Create standard lab result messages or create unique messages for individual lab results through our easy message recording technology that is available 24/7.

Patient alerts: After providers' lab messages are recorded, patients are notified that they can retrieve their lab results; they are re-notified if messages are not retrieved.

“ *The customer service is superb!
Everyone we have spoken to is
very helpful and extremely NICE!!* ”

*- Business Manager
White River Family Eye Care, VT*

- LabPhone helps make sure that potentially life-threatening lab results are addressed.
- LabPhone enables the practice to account for each and every laboratory result communication.
- Your practice can configure the system so that it closely resembles what staff does today, making it easy to use and maintain.
