

Outreach

Communicate with customers or patients that have specific needs.

“Hello, this is Main Street Medical calling you with an important message with regard to your health...”

Key features of Outreach:

Meaningful Use: Outreach helps medical practices meet the needs of “Meaningful Use,” thus increasing your chances of qualifying for financial incentives.

Displays your Caller ID: The Caller ID of your business or practice displays on customer’s or patient’s phones greatly increasing the number of answered calls.

Secure: Secure messaging enables you to effectively communicate with patients.

Flexible: Adjust your messages as often as you would like. Set up and launch calls to small or large groups of clients.

Excellent reporting: Call progress reporting allows you to analyze the success rate of Outreach - each new Outreach can be set up so that you can benefit from the knowledge learned from the previous Outreach.

Affordable: Pricing is affordable to businesses of all sizes - we put the latest telecommunication tools into the hands of small, medium, or large businesses.

“ We are happy with your services! We have been getting some patient feedback recently, which was very positive. ”

- Office Manager
Medical Healthcare, NJ

- Medical practices who have patients with specific disease states (for example, diabetics, hypertension) and who must take preventative measures as outlined in the recent Meaningful Use guidelines.
- Businesses that need to send calls, text messages, or emails that cater to varying groups of clients.
- Any business that is looking to convert one-time customers to regulars.
